Introductions

Dr Robert Malone – A Specialist in Vaccines

The inventor of mRNA vaccines and RNA transfection, Dr Malone has extensive research and development experience in the areas of pre-clinical discovery research, clinical trials, vaccines, gene therapy, bio-defence, and immunology. He has over twenty years of management and leadership experience in academia, pharmaceutical and biotechnology industries, as well as in governmental and non-governmental organisations. He has been involved in developing, designing, and providing oversight of approximately forty phase 1 clinical trials and twenty phase 2 clinical trials, as well as five phase 3 clinical trials. He has served as Medical Director/Medical Monitor on approximately forty phase 1 clinical trials, and on twenty phase 2 clinical trials, including those run at vaccine-focused clinical research organizations.

[Dr Robert Malone](#), is the original inventor of the mRNA vaccine (and DNA vaccine) core platform technology currently used to create the vaccines. Dr Malone has been expressing serious concerns about how therapeutic approaches that are still in the research phase are being imposed on an ill-informed public. He says that public health leadership has, "stepped over the line and is now violating the bedrock principles which form the foundation upon which the ethics of clinical research are built". Dr Malone asks why health leaders seem to be so afraid of sharing the adverse event data. He says, "Why is it necessary to suppress discussion and full disclosure of information concerning mRNA reactogenicity and safety risks?"

Link: <https://youtu.be/Du2wm5nhTXY>

Dr. Jill Glasspool Malone

Dr. Jill Glasspool Malone is a specialist in pre-clinical, regulatory, and clinical project management, with special expertise in public policy and Federal regulatory issues. She has been a co-founder of a number of biotech companies and has held positions in the biotechnology industry and academia. She has an extensive publication record in gene therapy, DNA and RNA vaccines, immunology and public policy for infectious disease outbreaks.

Pfizer

News clip out of India reporting on how Pfizer negotiates with governments – 8-minute clip.

Link: <https://www.youtube.com/watch?v=2zoSSHx9QtA>

NZ Doctors

This next clip is 5 of 32 doctors, 100 nurses and 187 allied health professionals who have signed an open letter casting doubt on the Covid-19 vaccine, published on the NZDSOS website in late April.

Link: <https://nzdsos.com/videos/>

This is a 32 minute clip of these five New Zealand GPs.

Dr Alison Goodwin who emphasis what she learnt decades ago at med school.

1. Do No Harm
2. Fully informed consent
3. Patients have the right to decline medical treatment

Also on this clip is: Dr Cindy de Villiers, Dr Matt Shelton, Dr Emanuel Garcia and Dr Damian Woicik.

Dr Nikki Turner

Just to balance this up, here is a 4 minute clip I was sent – Dr Niki Turner – who is pro this vaccine. But is she correct in what she says, when she says the same process is taken with this vaccine as with others. as she mentions the *“safety will be monitored in the clinical trials and they await the outcome of the final clinical trials.”* The trouble is, by then ½ the world will have had the jab. So you decide.

Link: <https://covid.immune.org.nz/resources/video/covid-19-vaccines-dr-nikki-turner-ask-expert-ministry-health-nz>

Doctors 4 Ethics

The concerned local New Zealand Doctors that I mentioned belong to a group of hundreds of doctors globally called “Doctors 4 Ethics”. There is a lot of information on their website.

Link: <https://doctors4covidethics.org/letter-to-physicians-four-new-scientific-discoveries-crucial-to-the-safety-and-efficacy-of-covid-19-vaccines/>

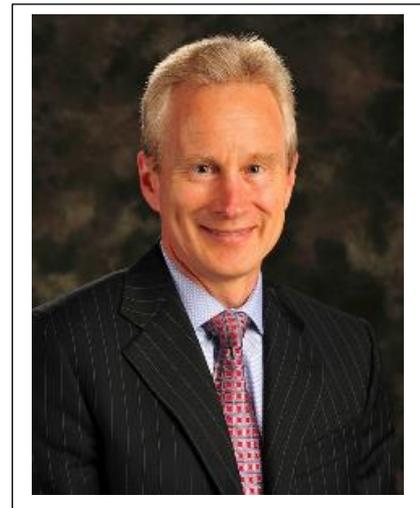

We are hundreds of doctors and scientists from all corners of the globe. We have written three letters to the European Medicines Agency, urgently warning of short term and long term dangers from COVID-19 vaccines, including clotting, bleeding and platelet abnormalities. We first began warning of blood-related risks before media reports of clotting led to vaccine suspensions around the world. In the absence of crucial safety data, we are demanding the immediate withdrawal of all experimental gene-based COVID-19 vaccines. We oppose vaccine passports, which threaten public health and violate Nuremberg and other protections. We are warning that ‘health passes’ place coercive pressure on citizens to submit to dangerous medical experimentation, in return for freedoms that once were human rights.

Letter to Doctors - ALL PHYSICIANS MUST RECONSIDER THE ETHICAL ISSUES SURROUNDING COVID-19 VACCINATION.

Dr. Peter McCullough

Dr. McCullough is a consultant cardiologist and Vice Chief of Medicine at Baylor University Medical Center in Dallas, TX. He is a Principal Faculty in Internal Medicine for the Texas A & M University Health Sciences Center. Dr. McCullough is an internationally recognized authority on the role of chronic kidney disease as a cardiovascular risk state with > 1000 publications and > 500 citations in the National Library of Medicine.

Link: <https://rumble.com/vhp7y5-full-interview-world-renowned-doctor-blows-lid-off-of-covid-vaccine.html%3CBR%3EFULL>

Michael Yeadon

Michael Yeadon is a scientific researcher and was Vice President of a division of drugs giant Pfizer Inc. He is highly experienced, innovative drug discoverer with 25y+ in the pharmaceutical industry. With a proven track record of successful initiation, leadership of, and delivery of multiple, positive PoC experimental drugs from, multi-disciplinary teams from idea to clinic, covering all major allergic, respiratory & dermatologic indications and including inhalation & biotherapeutic approaches.

Link: <https://drcharlieward.com/a-final-warning-to-humanity-from-former-pfizer-chief-scientist-michael-yeadon/>

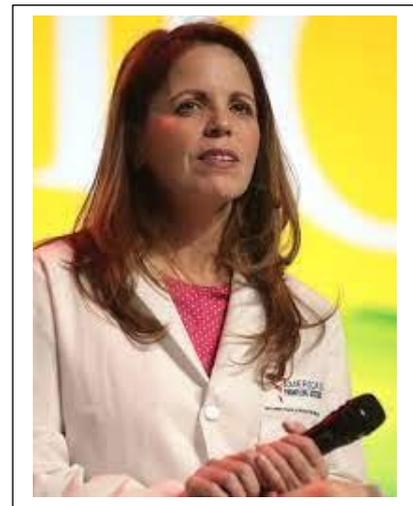

Dr Simone Gold

Dr Simone Gold is part of Ps Jurgen's church in San Diego. She is a member of America's Front-Line Doctors, a large group of prominent USA Doctors that have grave concerns about what is happening. She is Doctor, a Scientist and a Lawyer. I found her a very genuine person – you decide. She has lost her career by speaking what she sees and believes. Having now been called dangerous, deranged.

Link: <https://rumble.com/vfhko9-dr.-gold-awaken.html><BR

Simone Gold, MD, JD, FABEM, is a board-certified emergency physician. She graduated from Chicago Medical School before attending Stanford University Law School to earn her Juris Doctorate degree. She completed her residency in Emergency Medicine at Stony Brook University Hospital in New York. Dr. Gold worked in Washington, D.C. for the Surgeon General, as well as for the Chairman of the Labor and Human Resources Committee.

Naomi Wolf

An interview with Naomi Wolf – Naomi is a well-known liberal. A Biden supporter, she is a feminist icon with grave concerns where this is all going. This is not so much on the health aspect like the others.

Naomi Wolf – interview with Epoch Times Link:

https://link.theepochtimes.com/mkt_app/naomi-wolf-on-censorship-vaccine-passports-and-the-reversal-of-my-body-my-choice_3925296.html

Dr Charles Hoffe

Dr Hoffe explains how he has tested his patients who have received the COVID-19 shots and that 62% of them show blood clotting and permanent damage as a result. "The worst is yet to come" for these patients, he claims.

Link: <https://rumble.com/vjuhch->

Another link to it:

<https://www.bitchute.com/video/A6GbcUI6blpJ/>

Group of Canadian Doctors

In this next clip, a group interview facilitated by Sam Dubé, M.D., Ph.D., four physicians from across Canada – emergency physician Dr. Chris Milburn, rural family physician Dr. Charles Hoffe, General Surgeon Dr. Francis Christian, and Pathologist Dr. Roger Hodgkinson – tell their stories of persecution at the hands of their governing bodies. Their only crime: practicing evidence-based medicine by questioning the safety of their patients and the public during the pandemic.

Full Biographies

Dr Robert Malone

The inventor of mRNA vaccines and RNA transfection, Dr. Malone has extensive research and development experience in the areas of pre-clinical discovery research, clinical trials, vaccines, gene therapy, bio-defence, and immunology.

He has over twenty years of management and leadership experience in academia, pharmaceutical and biotechnology industries, as well as in governmental and non-governmental organizations.

Dr. Malone is a specialist in clinical research, medical affairs, regulatory affairs, project management, proposal management (large grants and contracts), vaccines and biodefense. This includes writing, developing, reviewing and managing vaccine, bio-threat and biologics clinical trials and clinical development strategies. He has been involved in developing, designing, and providing oversight of approximately forty phase 1 clinical trials and twenty phase 2 clinical trials, as well as five phase 3 clinical trials. He has served as medical director/medical monitor on approximately forty phase 1 clinical trials, and on twenty phase 2 clinical trials, including those run at vaccine-focused clinical research organizations.

Scientifically trained at UC Davis, UC San Diego, and at the Salk Institute Molecular Biology and Virology laboratories, Dr. Malone is an internationally recognized scientist (virology, immunology, molecular biology) and is known as one of the original inventors of mRNA vaccination and DNA Vaccination. His discoveries in mRNA non viral delivery systems are considered the key to the current COVID-19 vaccine strategies. Dr. Malone holds numerous fundamental domestic and foreign patents in the fields of gene delivery, delivery formulations, DNA vaccines and mRNA vaccines.

He received his medical training at North-western University (MD) and Harvard University (Clinical Research Post Graduate) medical school, and in Pathology at UC Davis.

Dr. Malone has close to 100 peer-reviewed publications and published abstracts and has over 11,477 citations of his peer reviewed publications, as verified by Google Scholar. His google scholar ranking is “outstanding” for impact factors. He has been an invited speaker at over 50 conferences, has chaired numerous conferences and he has sat on or served as chairperson on numerous NIAID and DoD study sections

rwmalonemd.com

Description

Robert Wallace Malone is an American virologist and immunologist criticized for promoting misinformation during the COVID-19 pandemic.

Dr Malone brings more than 20 years of management and leadership experience in academia, pharmaceuticals and biotechnology with deep expertise in regulatory and medical strategy for global clinical product development. Dr Malone is an internationally recognised physician and scientist for his work in the areas of clinical trials, vaccines, gene therapy, biodefense, and immunology and specifically as one of the original inventors of DNA vaccination and multiple non-viral gene therapy technologies (RNA and DNA).

Commenting on the new role, Robert said: "I am delighted to join the CNS Bio Desk USA consulting team; this is an exciting opportunity to work within a highly professional and experienced group that is dedicated to adding value to clients' early phase programs and their US regulatory strategies. "

Russell Neal, CNS Managing Director said: "Dr Malone brings a wealth of industry and consulting experience to our US Bio Desk team, and his appointment reflects CNS' ongoing commitment to the continuous growth and evolution of Bio Desk to service CNS' international clients as they navigate US and global regulatory strategies"

CNS' BioDesk division is an intelligent global product development and regulatory affairs consultancy specialising in readying products to swiftly enter the clinic or gain marketing approval. It is a uniquely internationally experienced team with particular expertise in the areas of vaccines, oncology, infectious disease as well as cell and gene therapies

Are people getting full facts on COVID vaccine risks?

[Viral Infections](#)

[Chest Infections](#)

The original inventor of the mRNA vaccine (and DNA vaccine) core platform technology currently used to create the vaccines is Dr Robert W Malone. Dr Malone has been expressing serious concerns about how therapeutic approaches that are still in the research phase are being imposed on an ill-informed public. He says that public health leadership has, "stepped over the line and is now violating the bedrock principles which form the foundation upon which the ethics of clinical research are built".

Dr Malone asks why health leaders seem to be so afraid of sharing the adverse event data. He says, "Why is it necessary to suppress discussion and full disclosure of information concerning mRNA reactogenicity and safety risks?"

He goes onto say that we should be analysing the safety data and risks vigorously. Again he asks, "Is there information or patterns that can be found, such as the recent finding of the cardiomyopathy signals, or the latent virus reactivation signals? We should be enlisting the best biostatistics and machine learning experts to examine these data, and the results should- no must- be made available to the public promptly".

For any drug it has always been important to have systems in place for monitoring adverse events. However, for an experimental, genetic modifying approach that has not been fully

tested, and where the public are effectively the guinea pigs, this information should be immediately and readily available. As previously reported in Total Health, the fact that it is so difficult to access and make sense of the US VAERS, and UK Yellow Card reporting systems - along with low reporting simply raises further concern about what is actually happening.

According to the official summary yellow card reporting website, "Vaccination is the single most effective way to reduce deaths and severe illness from COVID-19. A national immunisation campaign has been underway since early December 2020". However, as widely reported in 2020 and following a meta-analysis of work performed by doctors around the world treating Covid patients, the drug Ivermectin could well have been a more effective and safer alternative to experimental genetic modification.

In podcasts with Lex Fridman and with Joe Rogan, research biologist Bret Weinstein clearly explains the situation with regard to research, biology and censorship - Truth, Science, and Censorship in the Time of a Pandemic.

Inventor of mRNA vaccines and DNA vaccines; world-wide expert in RNA technologies RW Malone MD, LLC: Consultancy and Analytics in the Bio-sector

Dr Peter McCullough

- Professor of Medicine
- Vice Chief of Internal Medicine
- Baylor University Medical Centre, Dallas, TX

After receiving a bachelor's degree from Baylor University, Dr. McCullough completed his medical degree as an Alpha Omega Alpha graduate from the University of Texas Southwestern Medical School in Dallas. He went on to complete his internal medicine residency at the University of Washington in Seattle, cardiology fellowship including service as Chief Fellow at William Beaumont Hospital, and master's degree in

public health at the University of Michigan. Dr. McCullough is a consultant cardiologist and Vice Chief of Medicine at Baylor University Medical Centre in Dallas, TX. He is a Principal Faculty in internal medicine for the Texas A & M University Health Sciences Centre. Dr. McCullough is an internationally recognized authority on the role of chronic kidney disease as a cardiovascular risk state with > 1000 publications and > 500 citations in the National Library of Medicine. His works include the "Interface between Renal Disease and

Cardiovascular Illness” in Braunwald’s Heart Disease Textbook. Dr. McCullough is a recipient of the Simon Dack Award from the American College of Cardiology and the International Vicenza Award in Critical Care Nephrology for his scholarship and research. Dr. McCullough is a founder and current president of the Cardiorenal Society of America, an organization dedicated to bringing cardiologists and nephrologists together to work on the emerging problem of cardiorenal syndromes. His works have appeared in the *New England Journal of Medicine*, *Journal of the American Medical Association*, *Lancet* and other top-tier journals worldwide. He is the co-editor of *Reviews in Cardiovascular Medicine*, and associate editor of the *American Journal of Cardiology and Cardiorenal Medicine*. He serves on the editorial boards of multiple specialty journals. Dr. McCullough has made presentations on the advancement of medicine across the world and has been an invited lecturer at the New York Academy of Sciences, the National Institutes of Health, U.S. Food and Drug Administration (FDA), European Medicines Agency, and the U.S. Congressional Oversight Panel.

Major Contributions

- Senior leadership and oversight of clinical, education, and research operations at major academic medical centres in Detroit, Kansas City, and Dallas
- Led observational studies and randomized trials of therapies for acute kidney injury, hypertension, acute coronary syndromes, heart failure, and cardiorenal syndromes
- Chaired and participated on 15 data safety monitoring committees for large randomized trials
- Advised sponsors and the FDA resulting in approval of 15 new drugs and 3 novel in vitro diagnostic tests used today around the world

Mike Yeadon

Chief Scientific Advisor at Undisclosed at present
Canterbury, England, United Kingdom

April 2021. I now seek opportunities to relocate to the USA & to continue opposing inappropriate policy responses to covid19.

Apr 2020. Unpaid student of the SARS/CoV-2 pandemic & especially the odd policy responses.

March 2018. Medical issues have prompted retirement. I have no regrets and have enjoyed my professional career hugely. Thanks to everyone with whom I've worked over the years.

Proven track record of value delivery & leadership of complex teams. Drug hunting remains one of the last truly important, organised tests for human kind.

Highly experienced, innovative drug discoverer with 25y+ in the pharmaceutical industry.

Proven track record of successful initiation, leadership of, and delivery of multiple, positive PoC experimental drugs from, multi-disciplinary teams from idea to clinic, covering all major allergic, respiratory & dermatologic indications and including inhalation & biotherapeutic approaches. Clear track record of identifying new ways to exploit breaking science from area and to apply it to another (clinical re-purposing). Good understanding of the marketplace and of deploying early commercial insights. Adds to the bottom line.

Mylan acquired assets from the portfolio I previously led.

An independent since 2011.

Industry experience: 24 years (Ziarco, Consulting, Pfizer, GW, Welcome Labs)

Papers published: 40 full papers, 63 abstracts, 2 books; # Patents published: 6

Innovator in inflammatory, immune and allergic diseases, developed out of deep knowledge of biology, therapeutics and business. Experienced in delivery of experimental therapeutics by oral, inhaled, nasal and injected routes. Ability to lead & work well within a team and to bring about important and long-lasting change to organisational structures, capabilities and direction. Significant business development experience. Influences to CEO level.

Specialties: Value creation via applied pharmaceutical R&D. Oral, topical and inhaled drugs - from target selection, project design, compound selection and advancement, as well as clinical testing and regulatory requirements, incorporating the role of different inhaler devices and formulation platforms.

Experience

Chief Scientific Advisor - Undisclosed at present

Jul 2021 – Present 2 months | United States

Public education on health & science

Co-Founder - Ziarco

Jun 2011 - Apr 2017 5 years 11 months | Kent, UK

Ziarco was acquired by Novartis in January 2017.

Ziarco is an independent, clinical stage biotechnology company progressing novel & differentiated therapies for inflammatory and allergic diseases, using both oral and topical routes of delivery. www.ziarcopharma.com

Consultant - Apellis Pharmaceuticals

Aug 2011 - Aug 2016 5 years 1 month | Louisville, Kentucky

Guidance on scientific and strategic matters

Consultant (Scientific Advisory Board) - Pulmatrix

Aug 2011 - Feb 2016 4 years 7 months | Boston

Guidance on strategic and technical matters, both as SAB member and as advisor to senior management team & BOD www.pulmatrix.com

CSO and VP, Allergy & Respiratory Research Head

Jun 2006 - Oct 2011 5 years 5 months

As CSO, I was responsible for the targets selected and for progress into humans of new molecules, testing the medical hypothesis underwriting the research programme. Left mid-

2011 for new ventures.

Was proud of the output from the Allergy & Respiratory therapeutic area which grew in size and capability under my leadership.

VP, Allergy & Respiratory Head, Research

Jan 2005 - Aug 2008 3 years 8 months

I established competitive and pre-competitive collaborations with other companies, leading laboratories and with governmental bodies. Invited speaker at scientific / educational conferences. Involvement in successful partnerships and alliances (Leader / team member in the following: Rigel - syk inhibitors; Encysive - Thelin/acquisition; Meridica - device acquisition; B-I - Spiriva co-promotion)

I firmly believe we know too little to be truly certain of very much, and thus both model and...

Chief Scientific Officer, Allergy & Respiratory Research *Pfizer R&D*

1995 - Oct 2011 16 years

Inhalation is an important route for delivery of many medicines for treatment of chronic lung diseases. Design of ideal inhaled agents is challenging and we have made important advances in understanding how to do it. Capabilities included a proprietary inhalation delivery device and a promising mid-stage pipeline of inhaled and oral drugs. I was fortunate to have led teams to discover and undertake initial development of 22 compounds, with many showing good evidence of clinical activity...

Owner - Yeadon Consulting

Jul 2011 - Aug 2011 2 months

Professional advice on research direction, design of preclinical and early clinical tests to generate value, execution and pharma needs in the marketplace.

Senior Principal Scientist - Wellcome Research

1988 – 1995 7 years

I worked at the Wellcome Research Labs with Salvador Moncada from 1988, with a research focus on airway hyperresponsiveness and effects of pollutants including ozone and working in drug discovery of 5-LO, COX, PAF, NO and lung inflammation. With Lars Gustafsson and colleagues, I was the first to detect exhaled NO in animals and later to induce NOS in lung via allergic triggers

Doctoral student - University of Surrey

1985 – 1988 3 years

A biologist by training, I have a BSc in Biochemistry/Toxicology (1985) and a PhD in Pharmacology (1988), where I researched the CNS and peripheral pharmacology of the effects of opioids on respiration. I worked up and published the first method to measure 'true pA2' for antagonists in vivo.

Education

University of Surrey | BSc 1st class Biochemistry Toxicology Pharmacology | 1981 - 1985

Visiting year working at UK Home Office Central Forensic Sciences Labs, Aldermaston; and at MOD Chemical Defence Establishment, Porton Down

Publications

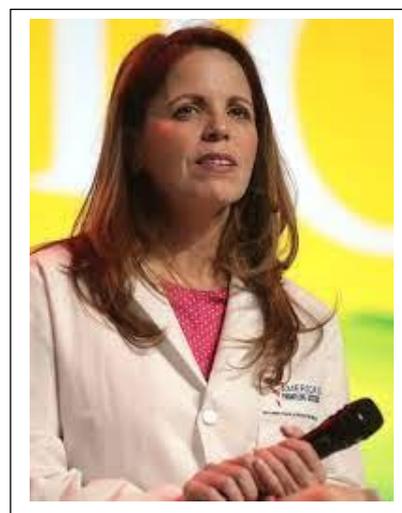

The discovery and profile of PF-0868087, a CNS-sparing Histamine H3 receptor antagonist for the treatment of Allergic Rhinitis
Med Chem Communications November 25, 2012

Dr Simone Gold - American physician

Dr Simone Gold, MD, JD, FABEM, is a board-certified emergency physician. She graduated from Chicago Medical School before attending Stanford University Law School to earn her Juris Doctorate degree. She completed her residency in Emergency Medicine at Stony Brook University Hospital in New York. Dr. Gold worked in Washington, D.C. for the Surgeon General, as well as for the Chairman of the Labor and Human Resources Committee. She works as an emergency physician on the frontlines. Her clinical work serves all Americans: from urban-inner city, to suburban and the Native American population. She writes on a number of policy issues relating to law and medicine. She always leads with the facts.

Description

Simone Melissa Gold is an American anti-vaccine activist, physician, attorney, author, and the founder of America's Frontline Doctors, an American right-wing political organization known for spreading misinformation about the COVID-19 pandemic. Wikipedia
Profession: Emergency physician
Education: Renaissance School of Medicine at Stony Brook University (1997).

Michael Yeadon / Michael Levitt / Dr. Luc Montagnier

Michael Yeadon was a scientific researcher and vice president of a division of drugs giant Pfizer Inc. He co-founded a successful biotech. Then his career took an unexpected turn.

Late last year, a semi-retired British scientist co-authored a petition to Europe's medicines regulator. The petitioners made a bold demand: Halt COVID-19 vaccine clinical trials.

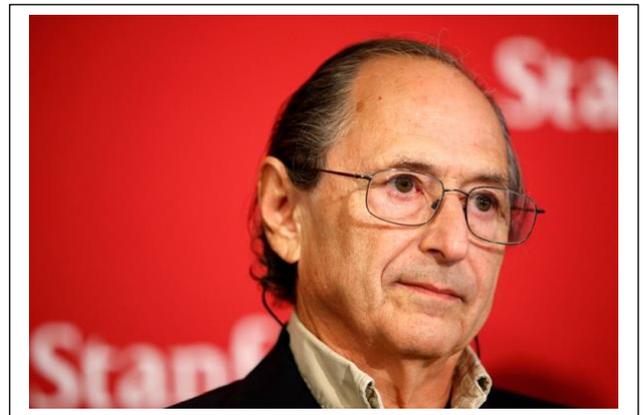

Even bolder was their argument for doing so: They speculated, without providing evidence, that the vaccines could cause infertility in women.

Michael Yeadon, wasn't just any scientist. The 60-year-old is a former vice president of Pfizer, where he spent 16 years as an allergy and respiratory researcher. He later co-founded a biotech firm that the Swiss drug maker Novartis purchased for at least \$325 Million.

What gives Yeadon particular credibility is the fact that he worked at Pfizer,

Yeadon isn't the only respected scientist to have challenged the scientific consensus on COVID-19 and expressed controversial views.

Michael Levitt, a winner of the Nobel Prize for chemistry

Dr. Luc Montagnier, who won a Nobel Prize for his part in discovering HIV, said last year he believes the coronavirus was created in a Chinese lab. REUTERS/Yuri Gripas
